SUBJECT INDEX

Aeration and agitation, in glucose oxidase production, 379
Air sterilization, thermal, 483
Amino acid oxidase, insoluble, 399
Amylase, *B. subtilis*, 251
Arginine, from *E. coli*, 889
Bacillus genus, proteases from, 179, 213
Bacillus subtilis, amylase, 251
BOD, kinetics in dilute systems, 519
Candida utilis,
  growth, 975
  transaldolase from, 321
Cellulose, continuous enzymatic saccharification, 921
Chemostat, mathematical model, 747
Chromatography, preparation of reversed phase packing, 1099
Claviceps paspali, lysergic acid production, 641
Coliphage, capsular protection against, 341
Continuous culture,
  mixing effects in, 1001, 1019
  models, considering viability, 1081
  responses following induction, 347
Continuous fermentation,
  effect of ethanol on stability, 561
  xanthan biopolymer production, 75
Cultures, mixed
  interactions in microbial ecosystems, 333
  predator-prey interactions, models for, 353
Dialysis fermentation,
  growth and lactic acid production, 961
  salicylic acid from naphthalene, 577, 591
  threonine biosynthesis, 603
DNA, oriented, preparation by wet-spinning, 93
E. coli, enzymes from, 889
Enzymes,
  inactivation by shearing, 1103
  induction kinetics, 651
  industrial, 157
Enzymes, insoluble
  amino acid oxidase, 399
  glucoamylase, 85
  polymer-entrapped, 19
Enzymes, isolation
  amylase, 251
  from *E. coli*, 889
  prolyl-tRNA synthetase, 63
  transaldolase, 321
Enzyme reactions,
  continuous saccharification of cellulose, 921
  enzyme retention by ultrafiltration, 615
  optimal control, 291
Eremothecium ashbyii, lysis with enzymes, 167
Extended culture, 975
Fermentor, tower, performance, 465
Flocculation, for cell recovery, 873
Formylmethionine, from *E. coli*, 889
Fructose, from glycerol, 913
Gluconic acid, from glucose, 273
Glucose oxidase production, aeration and agitation, 379
Glutamic acid, from *E. coli*, 889
Kinetics,
  bacterial oxidation of ferrous sulfate, 29
  BOD, dilute systems, 519
  differentiation and product formation, 845

dipeptide hydrolysis with proteases, 313
enzyme induction, 651
extended culture, 975
fermentation, enzymatic models, 831
glucose to gluconic acid, 273
growth and lactic acid production in dialysis culture, 961
high substrate concentrations, 679
salicylic acid in dialysis culture, 591
Lactic acid, production in dialysis culture, 961
Lactobacillus dellbrueckii, lactic acid production, 961
Leaching, microbiological, zinc sulfide, 501
Lysergic acid, medium for, 641
Lysis, living cells, with enzymes, 167
Mannitol, from glycerol, 913
Mannosidase, location and action, 159
Methanomonas, lysis with enzymes, 167
Models, mathematical, 645
batch penicillin fermentations, 803
chemostat, 747
continuous culture, 1069
cultures with two liquid phases, 713
enzymatic, for fermentations, 831
predator-prey interactions, 353
tower fermentor performance, 465
Oxidation-reduction potential, in tissue culture, 409, 419
Oxygen absorption,
determination of transfer coefficients in viscous fermentations, 849
in systems of zero-order reaction rate, 51
Oxygen electrodes, 145, 633
Penicillin production,
models for batch processes, 831
optimum temperature profiles for, 1081
Phenylalanine transfer RNA, from *E. coli*, 889
Proteases,
alkaline, 213
neutral, 179
kinetics, 313
Protein, microbial
cell recovery through flocculation, 873
concentrate production, 947
concentration of yeast by evaporation, 123
spray drying and cell viability, 135
Proteins, separation with heteropolyacids, 1
Pseudomonas fluorescens, salicylic acid production from naphthalene, 577
Pseudomonas ovalis, glucose conversion by, 273
Single-cell protein (see Protein, microbial)
Starch conversion, with insoluble glucoamylase, 85
Steroids, transformation with insoluble enzymes, 19
Smallpox vaccine, freeze drying of, 141
Thermolysin, kinetics, 313
Thiobacillus ferrooxidans, oxidation of ferrous sulfate, 29
Threonine, biosynthesis in dialysis culture, 603
Tissue culture,
effects of sodium hypochlorite, 635
glucose and lactic acid trends in, 429
oxidation-reduction potential and growth, 409, 419
Ultrafiltration, of enzymes during reaction, 615
Waste treatment, biological,
kinetics and mechanism of BOD exertion, 519
respiratory relations, 541
Xanthan biopolymer, production by continuous fermentation, 75
Yeast, concentration by evaporation, 123

INTERSCIENCE PUBLISHERS

a division of JOHN WILEY & SONS · NEW YORK · LONDON · SYDNEY · TORONTO

Copyright © 1970 by John Wiley & Sons, Inc.

Statement of ownership, management, and circulation (Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Date of filing: October 10, 1970

2. Title of Publication: Biotechnology and Bioengineering

3. Frequency of issue: Bimonthly

4. Location of known office of publication: Mack Printing Company, 20th and Northampton Streets, Easton, Pennsylvania 18042

5. Location of the headquarters or general business offices of the publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016

6. Names and addresses of publisher, editor, and managing editor:
Publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: Elmer L. Gaden, Jr., Department of Chemical Engineering, Columbia University, New York, New York 10027
Managing Editor: None

7. Owner: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
Stockholders owning or holding 1 per cent or more of John Wiley and Sons, Inc. stock as of August 31, 1970:
Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; John P. Gilbert, Executive of Estate of Julia Wiley Gilbert, c/o Wells Fargo Bank, Trust Division 37165, P. O. Box 3820, San Francisco, California 94120; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley and Francis Lobdell, Trustees Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Charlotte Levinger, Executive of Estate of Willy Levinger, 336 Central Park West, New York, New York; Eric S. Proskauer and Charles H. Lieb, Trustees u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell and William J. Seawright, Trustees f/b/oDeborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Cynthia W. Darby and Julia Gilbert, Trustees under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Francis Lobdell and William J. Seawright, Trustees f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Francis Lobdell and William J. Seawright, Trustees f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Edward P. Hamilton and Cynthia Wiley Darby, Trustees under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; Cudd & Company, 1 Chase Manhattan Plaza, New York, New York; Dif & Company, P. O. Box 1447, 135 Devonshire Street, Boston, Massachusetts; W. Bradford Wiley and E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York; Pitt & Company, P. O. Box 2444, Church Street Station, New York, New York; Reing & Company, P. O. Box 491, Church Street Station, New York, New York; Shaw & Company, P. O. Box 491, Church Street Station, New York, New York 10015; Jog & Company, P. O. Box 1447, Boston, Massachusetts 02104; Sigler & Company, c/o Manufacturers Hanover Trust Company, New York, New York 10015; and Trussal & Company, National Bank of Detroit, c/o Trust Department, Detroit, Michigan.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amounts of bonds, mortgages, or other securities: None

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

10. Extent and nature of Circulation

	Average no. copies each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total no. copies printed (*Net Press Run*)	1700	1700
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	—	—
2. Mail subscriptions	1279	1279
C. Total paid circulation	1279	1279
D. Free distribution (*including samples*) by mail, carrier or other means	15	15
E. Total distribution (*sum of C and D*)	1294	1294
F. Office use, left-over, unaccounted, spoiled after printing	406	406
G. Total (*sum of E & F—should equal net press run shown in A*)	1700	1700

(*Signature of editor, publisher, business manager, or owner*)

I certify that the statements made by me above are correct and complete. JAMES A. McNEISH

J. C. Bryant: Glucose and Lactic Acid Trends in Suspension Cultures of Two Established Mammalian Cell Strains in Chemically Defined Media 429
E. A. Falch and E. L. Gaden, Jr.: A Continuous, Multistage Tower Fermentor. II. Analysis of Reactor Performance 465

Issue No. 4, July

M. A. Chatigny, A. A. Sarshad, and G. F. Pike: Design and Evaluation of a System for Thermal Decontamination of Process Air 483

A. E. Torma, C. C. Walden, and R. M. R. Branion: Microbiological Leaching of a Zinc Sulfide Concentrate 501
E. M. Jennelle and A. F. Gaudy, Jr.: Studies on the Kinetics and Mechanism of BOD Exertion in Dilute Systems 519
F. J. Humenik and G. P. Hanna, Jr.: Respiratory Relationships of a Symbiotic Algal-Bacterial Culture for Wastewater Nutrient Removal .. 541
D. O. Zines and P. L. Rogers: The Effect of Ethanol on Continuous Culture Stability 561
B. J. Abbott and P. Gerhardt: Dialysis Fermentation. I. Enhanced Production of Salicylic Acid from Naphthalene by *Pseudomonas fluorescens* 577
B. J. Abbott and P. Gerhardt: Dialysis Fermentation. II. Kinetic Analysis of Salicylic Acid Production Via Cell Growth and Maintenance 591
B. J. Abbott and P. Gerhardt: Dialysis Fermentation. III. Anomalous Inhibition of Threonine Biosynthesis in an Auxotrophic Mutant of *Escherichia coli* 603
T. A. Butterworth, D. I. C. Wang, and A. J. Sinskey: Application of Ultrafiltration for Enzyme Retention During Continuous Enzymatic Reaction 615

Communications to the Editors

D. E. F. Harrison and K. V. Melbourne: An Autoclavable Version of the Mackereth Oxygen Probe 633
W. C. Jordan, J. F. Rosensteel, W. F. Daniels, and L. H. Garcia: The Effect of Small Amounts of Sodium Hypochlorite on the Growth of Earl's "L" Cells in Suspension Growth 635
A. Mizrahi and G. Miller: A Defined Medium for the Production of Lysergic Acid Alkaloids by Claviceps paspali 641

Issue No. 5, September

H. M. Tsuchiya: Introductory Comments 645
A. L. Koch and R. Coffman: Diffusion, Permeation, or Enzyme Limitation: A Probe for the Kinetics of Enzyme Induction 651
V. H. Edwards: The Influence of High Substrate Concentrations on Microbial Kinetics 679
L. E. Erickson, L. T. Fan, P. S. Shah, and M. S. K. Chen: Growth Models of Cultures with Two Liquid Phases: IV. Cell Adsorption, Drop Size Distribution, and Batch Growth 713
T. B. Young, D. F. Bruley and H. R. Bungay, III: A Dynamic Mathematical Model of the Chemostat 747
R. D. Megee III, S. Kinoshita, A. G. Frederickson, and H. M. Tsuchiya: Differentiation and Product Formation in Molds 771
A. Constantinides, J. L. Spencer, and E. L. Gaden, Jr.: Optimization of Batch Fermentation Processes. I. Development of Mathematical Models for Batch Penicillin Fermentations 803

R. D. Tanner: An Enzyme Kinetic Model for Describing Fermentation Processes 831
Z. Fencl: Comments on Differentiation and Product Formation in Molds. 845

Issue No. 6, November

C. M. Tuffile and F. Pinho: Determination of Oxygen-Transfer Coefficients in Viscous Streptomycete Fermentations 849
L. L. Ganser and D. I. C. Wang: Microbial Cell Recovery Enhancement through Flocculation 873
H. O. Weeren, A. D. Ryon, D. E. Heatherly, and A. D. Kelmers: Gram-Scale Purification of Arginine, Formylmethionione, Glutamic Acid and Phenylalanine Transfer Ribonucleic Acids for *E. coli* K-12 M07 889
H. Onishi and T. Suzuki: Microbial Production of D-Mannitol and D-Fructose from Glycerol 913
T. K. Ghose and J. A. Kostick: A Model for Continuous Enzymatic Saccharification of Cellulose with Simultaneous Removal of Glucose Syrup 921
G. Hedenskog, H. Mogren, and L. Enebo: A Method for Obtaining Protein Concentrates from Microorganisms 947
M. R. Friedman and E. L. Gaden, Jr.: Growth and Acid Production by *Lactobacillus* (*L.*) *delbrueckii* in a Dialysis Culture System 961
V. H. Edwards, M. J. Gottschalk, A. Y. Noojin, III, L. B. Tuthill, and A. L. Tannahill: Extended Culture: The Growth of *Candida Utilis* at Controlled Acetate Concentrations 975
C. G. Sinclair and D. E. Brown: Effect of Incomplete Mixing on the Analysis of the Static Behaviour of Continuous Cultures 1001
L. T. Fan, L. E. Erickson, P. S. Shah, and B. I. Tsai: Effect of Mixing on the Washout and Steady-State Performance of Continuous Cultures. 1019
C. G. Sinclair and H. H. Topiwala: Model for Continuous Culture Which Considers the Viability Concept 1069
A. Constantinides, J. L. Spencer, and E. L. Gaden, Jr.: Optimization of Batch Fermentation Processes. II. Optimum Temperature Profiles for Batch Penicillin Fermentations 1081
